

Report – November 2020

Financial summary:

Project agreed: November 25th 2019: Grant of US\$ 15,625 from the Fondation Eagle to the Condor Trust for Education for the continuation of eye tests/glasses in and around Quito, Ecuador

Amount overspent and carried forward, with agreement from Fondation Eagle, from previous phase: US\$916

Amount spent on new campaigns in period to November 2020: US\$14,934

Amount remaining: US\$691 (November 2020)

Background to the Project

The Condor Trust provides funding for secondary and further education for young people from low-income families in Ecuador. Several years ago, we became aware that many children are not making the most of their education because of sight problems. Encouraged by the Eagle Foundation, we looked into how we could help improve this situation, and linked up with a local Ecuadorian charity, Vista para Todos (Sight for All), which provides eye-tests and glasses.

Since mid-2012 the Eagle Foundation has been supporting this project. We have now received seven rounds of funding, and up to November 2020 in total we have:

- Performed 5,542 eye tests;
- Provided 2,320 pairs of glasses.

The Current Project

Between the end of 2019 and the beginning of November 2020, we organised a total of 7 campaigns:

- In January 2020, we visited the **Caminos de Esperanza centre** in Quito. This is a facility in a poor area of Quito which offers shelter and education to vulnerable young people.
- **Honrar la Vida school** on the outskirts of Quito caters for very low income children aged from 5 to 15. We work regularly with this school on a number of projects, including music tuition.
- 20 of the students who **the Condor Trust** began to support in autumn 2019, and their siblings, needed glasses.
- At the beginning of March 2020, we undertook two campaigns, one in **Tocachi**, a rural school just to the north east of Quito, and one in a women's rehabilitation centre in **Latacunga**, to the south of Quito.
- Activities then had to stop, due to the lock-down related to Covid-19. Following the lifting of the most stringent phase of lock-down, two campaigns were conducted in October 2020, one covering the new students and families **the Condor Trust** began to support in autumn 2020, and one at **TESPA (Talleres Escuela San Patricio)**, a centre for vulnerable adolescents, in Quito.

In total in the year 2019/20, we conducted 618 eye tests and provided 330 pairs of glasses.

Project Ref: FF 0507-28 Eye Tests & Glasses – Condor Trust, Ecuador

Expenditure Details and Notes

Summary of Expenditure by Campaign, up to early November 2020

Name of School/Organisation	Date of campaign	No. of Eye Tests	Cost of Eye Tests (\$)	No. of Glasses	Cost of Glasses (\$)	Total Costs (\$)
<i>Spent in 2018/19 and carried forward</i>						916.0
Condor families	01/09/2019 & 5/1/2020	20	50.0	13	414.8	553.2
Caminos de Esperanza	14 January 2020	46	115.0	29	1,249.0	1,364.0
Honrar la Vida school	17 February 2020	83	207.5	27	1,222.0	1,429.5
Tocachi	03 March 2020	92	230.0	26	1,038.0	1,268.0
Latacunga	10 March 2020	215	537.5	147	4,262.5	4,800.0
Condor/Honrar la Vida (outstanding payment) (1)	01 September 2020			4	201.0	201.0
New Condor students & families	01 October 2020	24	111.0	24	1,829.0	1,940.0
TESPA	01/2 October 2020	138	350.0	60	2,112.0	2,462.0
TOTAL SPENT		618	1,601.0	330	12,328.3	14,933.7

- Since the start of the project in 2012, Vista para Todos has provided eye tests at reduced rates. This means we pay US\$2.50 for most eye tests. Vista para Todos also provide all the glasses frames free of charge.
- The proportion of children needing glasses after having their eyes tested also varies from school to school. In some cases, teachers have done a preliminary screening and only put forward for eye tests those children who are identified as having a visual problem. In other cases, Vista para Todos considered it better for all children within an age group to be tested, as they are able to pick up problems which are not always obvious to non-trained personnel.

Campaign at TESPA, October 2020

TESPA (Talleres Escuela San Patricio) is a project which works in seven cities in Ecuador and which aims to give educational and pastoral care to young people who are in vulnerable situations, many of them living on the street.

Vista para Todos and the Condor Trust, with funds provided by the Foundation Eagle, visited the Quito project at the beginning of October 2020. They conducted 138 eye tests and found that 60 students needed glasses.

The glasses were given to the students at the start of November 2020. As usual, Vista para Todos staff talked to each student in detail about how to care for their glasses and how to best protect their eyesight in the future.

Our project encouraged more support

While doing the eye tests, an ophthalmologist found that one of the boys tested had a prosthetic left eye which he had received at an early age because of a tumour. Since then, lack of money meant that he had not been able to replace the prosthesis nor wear glasses, which in turn meant that the sight in his right eye had severely deteriorated.

From its own funds, Vista para Todos immediately admitted the boy for emergency treatment and gave him a new prosthesis and suitable glasses, at no cost to the family. He and his family were overjoyed.

Campaign at Young Women’s Rehabilitation Centre, Latacunga, March 2020

With talk of a lock-down increasing in early March, Vista para Todos was urgently asked to visit a rehabilitation centre in Latacunga, south of Quito, so those needing glasses could be tested before the restrictions were imposed.

Vista para Todos and the Condor Trust conducted 215 eye tests in the centre, and 147 young women were found to need glasses. In the event, the glasses could not be delivered until July, when the strict phase of lock-down was relaxed.

Story of a grateful recipient

One of the women in the centre had been there for two years, all the time without glasses, although she has a very high visual impairment. Her glasses had been damaged when she first went there - all that remained was a piece of one lens, which she kept so that she could at least see something (top photo).

She was *extremely* pleased to receive new glasses and once again to be able to see!
