

## **COMPLETION REPORT - Reference FF 450**

### **Our Sincere Gratitude to Eagle Foundation and the Noble service team through the esteemed guidance of friends of India.**

**01. Title of the Project:** Providing Transportation facilities for the stone quarry Community cum graveyard digging workers children at Planet Hope, Ashrayadeep Day care centre promoted by the Sacred Heart Brothers, Bangalore.

**02. Status of the Report:** Completion Report

**03. Amount of assistance sanctioned and Utilized:** £ 13,674

**04. Total beneficiaries:** 120 vulnerable children in Planet Hope, 80 Kids in the Ashrayadeep Day care centre and this include (Day care cum Planet Hope/per day) plus community Health programs conducted during week end using for the mobile clinic and medical campus. The beneficiaries through Medical camps would be approx. 265 – 315 monthly and 70 to 86 per day through Regular mobile clinic door step medical service every day.

**05. Report submitted by:** Bro. A. Backianathan, SHJ. Secretary, Sacred Heart Brothers, Bangalore, Karnataka.

### **06. Introduction:**

This report consolidates the project activities to provide transportation facility. The project area of the Sacred Heart Brothers, named Planet Hope, Ashrayadeep Day care center and Ashrayadeep Dispensary, at Geddalahalli, Bangalore was initiated to cater the need of education and health care need of the poor most quarry communities and their distressed children.

The subsidy was fully utilized for the purchase of new car for the Utilization of providing good transportation facilities to the poor most distressed children admitted at Planet Hope, Ashrayadeep Day care center and the Quarry communities for their education and health care supports.

Through this report we the Brothers along with the planet Hope, Ashrayadeep Day Care center Children, quarry communities and the poor and needy neighboring villagers, convey their heartiest thanks to Eagle Foundation and guidance of Friends of India, generous benefactors for purchasing this car and the team involved in this noble service as part of the generous help and financial support to implement and reaching out the targeted children and the quarry communities

## **07. Reasons for the Implementation of the project:**

- An innovative approach for the transportation facility provided for the most distressed children of quarry communities.
- The adult population in the target areas are mostly non literates. The literacy rate in the rural areas is around 60%. Brothers will promote the poor most children to go for schooling and conducting skill training.
- Brothers' experience in this area and the study undertaken by them revealed that Education alone could liberate the poorest communities from the clutches of poverty, exploitation and abuse and from the pitiful abysmal living conditions.
- At the same time, in addition of educational support the Sacred Heart Brothers decided to start Day care centre along with a health care service and initiated the same.
- Since the number of children admitted in Planet Hope, Ashrayadeep day care center attached with health care service are increasing every year, we are facing great challenge for the transportation of the children to send them different schools as well as for the need of the vehicle to other activities.
- The tempo tracks van is used for the dispensary activities like mobile clinic and medical camps. The same tempo tracks van that transports the children from Planet Hope home to schools is used to pick up and drop of the children from the stone quarries to the day care center.
- As a result of this, lots of wastage of time, energy and money is happening.
- As the timing of both the schools and the day care center is the same, the same vehicle has to run for both the purposes. Also, the over running of the vehicle every day causes very expensive when the vehicle is under maintenance, and there is no second option to substitute.
- Children are sent to different schools, like St. Mary's school, Alphonsa School and Jyothi School and the number of children is more as the total strength of Planet Hope and Ashrayadeep day care center.
- There is a risk factor in the transportation of children when the number is more.
- Brothers like to ensure the safety and security measure of the children which is one of our primary concerns.

## **08. Utilization of the assistance:**

- Hence, it was an urgent need a request was made for financial assistance to Eagle Foundation, through the guidance of Friends of India which was received with thanks as a donation towards the said purpose and the grants received has been utilized for the implementation of the project which was completed and initiated by Br.A.Backianathan, responsible for execution of the project.
- The assistance was spent for the purpose of providing transportation facility to reach needy targeted children and quarry community people to promote Education and health care services

- The car is maintained by the Sacred Heart Brothers, Bangalore in order to continue their good services for the least society.
- On completion of this project, the targeted community and their children are very grateful in utilizing the chance to have a good transportation facility s.

#### **09. Results achieved on completion of the project: (Outcome)**

The assistance from The Eagle Foundation helped the targeted communities and their distressed children to reach the following benefits:

- Provided the educational service for the targeted quarry workers communities, their children and its surrounding villager's Children and the other needy beneficiaries are more safety by present new car in getting good treatments for their ailments through the transportation facility availed.
- Planet Hope, Ashrayadeep day care center children are getting benefitted by this transportation facility.
- Transportation of staff for the awareness programs on education and health care supports is fulfilled
- Regular visits to the villages and promote our values of humanness is fulfilled.
- Due to lack of transportation facilities, as the various quarry sites are situated far from the Planet Hope cum daycare and the staff also find very difficult to reaching the stone quarries in evenings to meet the quarry workers for giving them awareness on Education and Health care. Hence a new four wheeler purchased through your good financial supports solved the problem.
- These good Transportation facilities provided to the distressed children of quarry workers and grave digging community, not only from the neighboring stone quarries but also from other quarries for the Day care program.
- This new car transportation facility is used to conduct medical camps and awareness camps on health, education to the literate/illiterate women and youth in the stone quarries, also used to conduct evening meetings, trainings and campaign in various stone quarries
