

Report for Fondation Eagle: Medical and Educational Aid to Kenya (MEAK) Project: MEAK / Milgis Community Vehicle, Milgis Conservancy, Samburu County, Kenya

Donor:

Fondation Eagle, Switzerland

Donor's Reference: FF460

Date of acceptance:

3rd September 2018

Date donation received:

21st September 2018

Amount of Donation:

A one-off donation of \$35,000,

3,540,600.03KSH at the exchange rate of 1 Kenyan shilling to 0.0099 US dollars

Date of delivery of vehicle to the Milgis Conservancy:

4th November 2018

Duration of project:

We estimate the vehicle to service the local community for the next 10 years

Estimated number of beneficiaries:

Approximately 50,000 people within the community as the vehicle is used to support water and family planning projects, for example, which assist thousands of people.

The new vehicle in the Samburu

Registered Charity No 1093115

Summary of vehicle achievements to date in Northern Kenya:

Improving access to:

- Healthcare
- Family planning
- Water
- Veterinary services

In addition, the vehicle assists with helping the community live in a way that supports and respects the natural resources and the biodiversity of the area by maintaining the local ecology, flora and fauna

Examples of the uses of the vehicle from the period November 2018 – April 2019:

MEDICAL CASES:

This vehicle carries out a large variety of field operations to help with healthcare in Northern Kenya. This includes the transportation of patients, doctors and medical supplies and equipment. There are many people whom we come across that have major health issues which cannot be dealt with locally, necessitating travel to medical facilities at Wamba, Nanyuki, Nairobi or Nyeri to receive the appropriate care. This means transporting them vast distances by vehicle to get the right medical attention. Below are some of the patients whom have been transport by the vehicle this year, including patients returning for check-ups and second operations, all utilising the MEAK vehicle.

Matine Lentooko:

This girl was brought to us by her father who was desperate for help. He fought for us to take her and had decided that she was going to die if she was not helped!! So naturally we took the girl to cottage hospital. She had malaria, which was why she was so sick. However, she also had a small goitre. This was not operated upon but instead treated medically to reduce the size of the tumor. To date, she has done a couple of trips up and down for check-ups and treatment at the cottage hospital.

Najarin from Lesilau and her grandmother

This young girl had an enlarged bladder and genital deformation. We brought her to Nyeri, together with her grandmother. She was admitted to Outspan hospital where Dr Kanina is based. At first it was difficult because she was not healthy enough to operate on. However, she has since had 2 operations. Both operations have been hugely successful and we are bringing her back and forth for check-ups in the vehicle.

Letuya and his mother:

Letuya presented with very swollen lymph nodes and extreme joint pain. Together they went to Wamba (hospital) where he was diagnosed with TB. He was given the appropriate medication and has since improved a lot!

Ntimiran from Balanga:

She has a small goitre and had been given a course of 3 months medication to take before we brought her back to Nanyuki for a check-up in the vehicle. She is still continuing with her medication.

Emmanuel Lekaringe:

Emmanuel has a kidney problem. He was taken to cottage hospital first and was then referred to Parklands Kidney Centre by Dr Butt, where they struggled to find an available doctor. However, he was able to get an MRI scan done in Mathari hospital. From there he was referred to radiology at the Aga Khan Hospital. Then he was then referred back to Parklands Kidney Centre where the doctor gave a verdict that sadly the left kidney has been damaged beyond repair but does not need to be removed.

**Ntabauwa Baraiya:**

She has a large growth coming off the side of the hip. She was examined by Dr Butt at Cottage hospital where she had an ultrasound and was given medication for 3 months. After the 3 months had elapsed, she was brought back in the vehicle and she had the growth removed.

Ltingwa Leleur from Ngurnit:

A Father came with his son – Ltingwa. This boy had lots of pain and swelling in his foot, which was suspected to be Madura foot. He went to Cottage hospital in the vehicle where a biopsy was done. However, they were not able to determine exactly what the problem was. There were no cancerous cells and it was not Madura! They gave him medication which has really helped with the swelling and pain!

Lenkaltaan Lekandany:

This young boy had a cow fall on top of him whilst he was at the bottom of a well - he referred to and operated upon by the MEAK team in Nyahururu! He is now back at home herding his cows!!!! And very, very happy! His one month in full plaster was totally worth it. A success, a life changed!!!!

Lucy Dominica & Ltajiri Lengesen:

Lucy and Ltajiri are both from Ngurnit. They both have the very sad problem of urinary tract deformation and deformed genitalia. Lucy has had two major operations and has been up and down to Nyeri many times for minor procedures and check-ups. As you can see below (far right) she is very, very happy with all the support that she has had. Ltajiri has also been taken to Dr Kanina in Nyeri and has had several operations and is much better. This year he has been driven up and down several times. Of course, none of this can happen without the use of the vehicle.

Lucy

Ltajiri

Lenabus Lmentina:

This Samburu warrior came to us with a terribly infected foot, so we referred him to the MEAK clinic in Nyahururu. They were able to amputate his infected lower leg to prevent further spread of the infection up his leg. After his surgery we managed to send him to Kijabe hospital and get him a strong prosthetic leg. He is one very happy warrior!!!! He is now back at home looking after his family and walking without too many problems!

Douglas Lenamarle:

Douglas is a teenager who is from Ngurnit. He too suffers from deformed genitalia and has been taken to see Dr Kanina in Nyeri. He has had a couple of operations and has been back this year for several check-ups. He can now lead a reasonably normal life and is very lucky to have had the MEAK vehicle to take him for treatment. He still has one more operation to go....

Nolkewal Lesaana:

This lady is from Sware and suffers from tumors in her neck. We collected her and took her to Kijabe hospital, where she will be having an operation soon. She will return for a second operation if this one goes well.

Lteti Lesirite:

This man came to us in a very bad state, suffering jaundice and in a lot of pain. We brought him to Nanyuki in the vehicle for tests. Sadly, he was diagnosed with advanced stages of cancer that was too difficult to operate on... We have had to take him back home. A truly heart-breaking situation for him and his family.

Sita Eisimgar:

This girl is from Ngurnit. She has been diagnosed with a bad form of epilepsy. We were able to get her to Nanyuki in the vehicle where she could be treated appropriately. She still requires regular check-ups and she will be taken from home to Nanyuki in the vehicle.

Lekuyie Klinie:

Lekuyie (klinie) Is an orphan who we have helped for many years now.... He has TB as well as other chronic illnesses so it has not been an easy road... He has nearly died several times and we keep taking him far and wide to get the treatment that he needs. He had his leg amputated a while ago. In January he was very sick so the vehicle brought him to the Nanyuki cottage hospital, where they were able to sort out his issues. He then went back in the same vehicle!

Ltusharen:

Ltusharen is a young Rendille boy we met whilst opening a water project in the eastern Ndoto mountains. He could only walk on all fours & his parents didn't know where to take him. We have since taken him for thorough physiotherapy and treatment..... And we have been taking him in the vehicle to a specialized school in Marsabit where he is very happy. It is a boarding school, where he receives physiotherapy and is educated.

Lobatino Leturra:

This elderly man was involved in a machete fight a while ago. He had been very badly cut, and his leg had not healed properly – in fact he could not use it at all. We were able to transport him to Nyahururu where, through MEAK, some local surgeons were doing a clinic – They performed an extremely successful operation which has significantly improved his situation!!

OTHER MEDICAL CASES:

It is common for our driver to pick up people along the way or to have unexpected emergencies that need dealing with. This vehicle has been helping these people too. Mostly in the communities near our base Below are some of the other cases that they have been logging:

KCS110A				
Date	Patients name	Diagnosis/reason	From	To
17.12.18	Lettura	MEAK Operatons in nyaruhuru	Urra	Lororoi
17.12.18	Lengaltam	MEAK Operatons in nyaruhuru	urra	Lororoi
23.12.18	Lekilit	Pregnant - Labour	Nkwe Ntome	Latakweny
08.01.19	?	Sick Woman	Nkwe Ntome	Latakweny
24.01.19	6 people?	Taken to clinic in sererit	Latakwen	Sererit

03.04.19	Leshekeret	?	Latakweny	Nanyuki
07.04.19	Maria Lekanapalk	?	Latakweny	Nkwe Ntome

WATER PROJECTS:

Dam Unit:

Our JCB dam-building unit relies heavily on the use of the MEAK vehicle. It delivers all the supplies, technicians and fuel to the remote dam sites. The vehicle visits the dam unit twice monthly carrying drums of water and diesel. Without the use of the vehicle, our dam building and maintaining team would find it extremely difficult to access the areas as frequently as they are currently able to. This translates to a reliable water supply for literally thousands of people in the Milgis community who rely upon this dam for their water supply.

Conservation activities:

Conservation Activities in the Milgis:

The vehicle is also key to helping us with conservation work. Recently it helped bring a vet who darted and then treated a sick bull elephant. It has also helped us to follow up and retrieve tusks from several elephant carcasses and to then deliver the tusks to the Kenya Wildlife services. The vehicle also helped distribute equipment to build 'elephant friendly' wells during the drought. The vehicle has also helped us to fight several big fires in the Ndoto mountains – delivering supplies and personnel to deal with these destructive fires!!!!

Family planning:

Family Planning Mobile Clinics partnering with CHAT:

The Milgis Trust is now undertaking four 2-week mobile family planning clinics per year. These clinics are in partnership with Communities Health Africa Trust (CHAT), who specialize in family planning services. Together we are providing access to contraception as well as medical treatment. This new vehicle is being used to transport all personnel and equipment, reaching the far corners of this remote region. Each clinic is covering more than 600 kilometres and reaching approximately 2000 people.

Budget details:

The donation of \$35,000 for the MEAK / Milgis vehicle at the exchange rate of 1KSH to 0.0099 USD to equates to 3,540,600.03 KSH. The quotation for the vehicle (see below), which includes the trade-in for the old (Fondation Eagle sponsored) MEAK vehicle, was for 3,505,000.00KSH. This represents an underspend of 35,600.03KSH (USD \$351.92). However, the quotation does not include on-road costs such as insurance.

Vehicle chassis details:

Thank you:

MEAK and the Milgis Trust give their heartfelt thanks to Fondation Eagle for their generous grant which has made the purchase of the vehicle possible. As you can see from the above stories the vehicle has immense value to the community and people's livelihoods and health overall.

Fondation Eagle can feel justifiably proud that they have made such a difference to so many people's lives and wellbeing. We look forward to further similar collaborative efforts in the future.
