

Analysis of Projects accepted during the year 2019 by Geographic sectors

| Continent and country | Amount in CHF & % |             | No of Beneficiaries & % |             |
|-----------------------|-------------------|-------------|-------------------------|-------------|
| <b>Asia</b>           |                   |             |                         |             |
| Nepal                 | 26,665            | 2.68%       | 15,900                  | 4.63%       |
| India                 | 19,403            | 1.95%       | 196                     | 0.06%       |
| Cambodia              | 89,126            | 8.96%       | 20,750                  | 6.04%       |
|                       |                   |             |                         |             |
| <b>Africa</b>         |                   |             |                         |             |
| Madagascar            | 67,732            | 6.81%       | 20,339                  | 5.92%       |
| Kenya                 | 210,750           | 21.18%      | 93,364                  | 27.18%      |
| Malawi                | 189,547           | 19.05%      | 184,729                 | 53.77%      |
| Ghana                 | 121,596           | 12.22%      | 939                     | 0.27%       |
| Zambia                | 74,120            | 7.45%       | 4,064                   | 1.18%       |
| Rwanda                | 51,419            | 5.17%       | 556                     | 0.16%       |
| Ethiopia              | 10,000            | 1.00%       | 750                     | 0.22%       |
| Uganda                | 52,021            | 5.23%       | 481                     | 0.14%       |
|                       |                   |             |                         |             |
| <b>South America</b>  |                   |             |                         |             |
| Ecuador               | 20,386            | 2.04%       | 745                     | 0.22%       |
|                       |                   |             |                         |             |
| <b>Europe</b>         |                   |             |                         |             |
| Switzerland           | 62,314            | 6.26%       | 720                     | 0.21%       |
|                       |                   |             |                         |             |
|                       |                   |             |                         |             |
| <b>Total for year</b> | <b>995,079</b>    | <b>100%</b> | <b>343,533</b>          | <b>100%</b> |
|                       |                   |             |                         |             |
|                       |                   |             |                         |             |

Notes to the tables:

1) Please note that most of the projects are funds for construction and purchase of equipment, and thus the beneficiaries will be on-going for several years. In the table above only 1 year's beneficiaries are counted; on average we count 7-10 years' use for construction in under-developed countries and 5-7 for equipment. So with the grants of 2019, at the lowest point of the spectrum, 5 years' beneficiaries, the Foundation's aid will benefit around 1,717,665 people in need, well under 1 CHF per person.

2) Food production and water projects have very high numbers of beneficiaries as the whole population of the region benefits whereas school construction, for example, is pricey and only benefits a certain number of children per year.

3) Health centers also have high numbers of beneficiaries as they include the whole population of the area.

4) Most charities defend vociferously that the benefits of a school constructed ought to include the whole population, the families etc as they all benefit. It is true that the whole society benefits, although in the above table only the numbers of students attending in 1 year are included, which in many cases will increase due to the new buildings.
