570-55 BOREHOLE REPAIRS PHASE 3 FINAL REPORT

Overview

Donor Name: Fondation Eagle

Project Name: Support for Covid-19 - Ripple Africa Borehole Repairs Phase 3

Grant Size: £16,887

Grant Period: Grant awarded 10th December 2020

Reference Number: 570-55

Project Overview

There are 2,271 boreholes across Nhkata Bay District with a similar quantity in Nkhotakota District and around 20% of these are broken. This funding has enabled us to repair a further 100 broken and nonfunctioning boreholes and shallow wells in Nkhata Bay District to enable more people to have access to safe supplies of water for handwashing to help reduce the spread of the Covid-19 virus in rural northern Malawi. Ripple Africa have again been able to work in partnership with the District Council to fund these repairs and to supervise the repair programme. This has been welcomed by the District Authorities and by the villagers who now no longer have to walk long distances to access a clean and safe water supply to help with handwashing and infection control. The District had been unable to afford the transport costs for collection of the spare parts from suppliers and for their maintenance team to be able to travel to the often remote villages where the broken boreholes were located.

In total, Fondation Eagle have now funded the repair of 400 broken boreholes and shallow wells in Nkhata Bay and Nkhotakota Districts, most of which needed new spare parts which the District Council had been unable to afford to buy. We have also received funding from another donor to repair a further 40, making a total of 440 boreholes and shallow wells repaired in Phases 1,2 and 3 of this project.

Project Beneficiaries

100 more boreholes and shallow wells were repaired - as each is used by an average of 150 people, this will have benefitted 15,000 people, some visiting several times each day.

Successes

As before, we were fortunate that the experienced borehole maintenance team employed by the District Council were already in place and able to be deployed quickly to repair the boreholes, once funding was available for the costs of transport and spare parts. The District Council in Nkhata Bay funded their salaries, but this campaign was to fund the costs of transport and the necessary spare parts. The full list of all wells and boreholes repaired with this funding is at Annex 1.

Challenges

The main challenge on this occasion has been the fact that the repairs have taken place during Malawi's rainy season, and the rains this year have been particularly heavy in Nkhata Bay District. This meant that we were unable to complete all the repairs as quickly as we had hoped that we would be able to do. The

road conditions were also challenging with some roads becoming impassable due to the rains so we had to revise our programme accordingly. However, we have now been able to complete repairs on all 100 boreholes and shallow wells which the District Council identified as being located in the highest priority areas.

Expenditure

The funding was used for the purchase of the parts needed to repair the boreholes, fuel costs and a small daily food allowance for the maintenance team to undertake the repairs, and the management and supervision to ensure that the work was carried out to the correct standard. The salaries of the maintenance teams were funded by the District Councils. Receipt for spare parts is at Annex 2.
