Notes to the tables:

1) In 2021 Fondation Eagle continued to concentrate on Covid related projects; mainly feeding, water supplies/installations and health projects

2) Many of the projects funded were for immediate support and aid therefore the actual beneficiaries only relate to the current year. This has resulted in an above average number of beneficiaries in 2021, totaling at 855,807. Unlike previous years where most of the projects were grants for construction and purchase of equipment, with benefits continuing over several years. However, in the table above only 1 year's beneficiaries were counted for each year; on average we count 7-10 years' use for construction in under-developed countries and 5-7 for equipment.
